REASONS FOR ALLOWANCE

1. Claims 1-15 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The prior art, USPN 7,159,172 to Bentley, teaches a display for using rapid sequential visual presentation (RSVP). RSVP is a display technique in which single words are presented in their sequential order. An RSVP region is generated in a stationary window located towards the center of a displayed image. A thumbnail view of a document page is also generated and placed in the image behind or under the RSVP region. The RSVP screen displays a sequence of words, generally one word at a time. Short phrase are suggested in the reference to Bentley as being sequentially presented to a user however the reference fails to teach/suggest the combination of limitations as presented in the independent claims. More specifically, the reference fails to teach the dividing of displays into both a read pane and a navigation pane, storing language specific rules of syntax in a memory, sequentially processing text portion based on the stored language specific rules of syntax to identify a start element and end element, utilizing the shift commands to further process connected portions of the selected text for a new start element and new end element and selecting the text portion between the new start element and new end element of a second text portion contiguous to said first portion for display as the next reading portion. It is the combination of limitations that are not suggested or taught by the prior art reference to Bentley nor would it have been obvious to one of ordinary skill in the art at the time the invention was made. Therefore, it is the combinations of limitations all together, as presently claimed, that overcome the prior art of record and are allowed.
